VyperSoft introduces ADMS Lite:

Based on requests from several agencies who would like to purchase ADMS, but do not need server-based multiple PC access, VyperSoft has developed a Standalone PC System which can support multiple users and individuals from a single computer! This "Lite" Version of ADMS still has all of the same functionality of the multi-PC environment, but is scaled to serve a single computer. This solution is ideal for Residential Home Care providers that have a single PC in a home environment, with several caregivers inputting data around the clock. This solution is only available to agencies with one

community PC as no server is included.

ADMS Lite is \$2,995 complete including the Laptop PC, 1st year support contract and on-site training. SPADD Show Special through May 2014: \$2,495! Annual support contracts are just \$595 per year. Call us at 770-480-4247 to set up a webinar demo today.

ADMS News

New Modules for Residential Caregiver Support (available to all Current ADMS Customers):

Import Note: VyperSoft ADMS does not charge upgrade fees to our existing customers when we add new features!

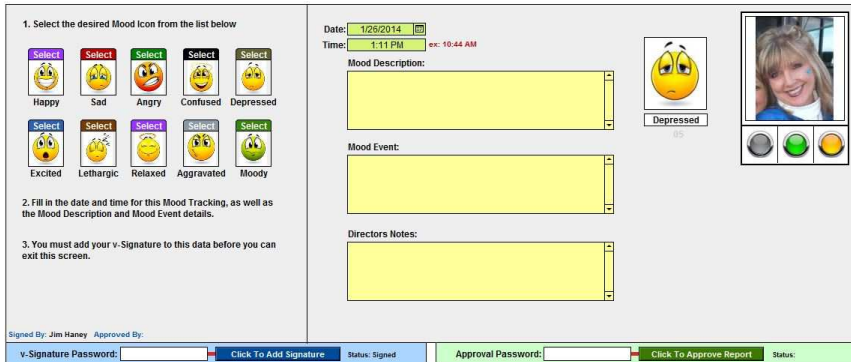

- Daily 15 Minute Checklist: Many residential providers are required to document updates on their individuals tracking as many as 18 behavior codes. We have included a note field and digital signature.
- Urine tracker: Tracks Urinary output, diaper consumption, urinary levels, color, ketone value, leakage, and blood with Digital Signature.

- Bowel tracker: Restroom Activity has been updated to include the Bristol Stool Chart with designations to Color, description, frequency and results with digital signature
- Mood tracker: Data and timestamp, with multiple selections, mood description note field, mood event field and direct staff notes, with digital signature.

Mood Tracking

- SleepTracker: Currently in development (Q2)
- Scheduling module for Home Care Providers (Q2)

ADMS ADVANTAGES

Advantages of choosing a Client/Server Software Solution versus a Web-Based System

VyperSoft ADMS is a Client/Server Electronic Documentation and Data Management system that provides Agencies with a comprehensive solution by putting an end to the mountains of paperwork required of Day Service Providers for Developmental Disabilities. We thought we would share the advantages of our solution compared to other Web-based Solutions on the market:

- **Client/Server licenses are a fixed software investment.** Other than paying for annual support agreements, you do not need to continually purchase software licenses. You can expect optimal speed and enhanced system performance, because you are not limited to the speed of the Internet, unless you are using a remote license. Your data is available to you even if your Internet goes out.
- **Your agency owns the software and the licenses,** and you host the system server in your office. Your data is right there under your roof, protected from data breaches that can happen on the unprotected Internet.
- **Cost of a Client/Server EDS system could be higher in the beginning** due to increased hardware requirements (a server) and the cost of purchasing the software licenses. This really depends on how many individuals your agency supports. Over time, however, the cost may be less than paying per individual per month and/or by the software module you choose.
- **Ability to access your Data Management software from anywhere at anytime** using remote connectivity configurations – so this is essentially the same.
- **Data backup and disaster recovery of your software** – VyperSoft ADMS backs up your data every hour and also offers encrypted offsite backup for a nominal annual fee.

About ADMS

VyperSoft's Agency Data Management System was developed with the assistance of agency coordinators to make it one of the most complete and user friendly solutions on the market today.

A complete electronic records management system, your data stays in your agency for security and reliability.

No IT Department...No Problem

When you purchase VyperSoft's ADMS, you do not have to worry about any of the installation or the maintenance of the installed equipment.

Your annual support fee covers everything...and we do mean everything. Should any item of the installed hardware fail, we will send a technician out to replace it.
