Electronic Documentation

Is Your Agency Ready?

In This Newsletter

Selecting the right Solution for Your Agency

We know researching Electronic Document Management providers can be a challenging task. After all, you are investing in that provider's strategic ability to provide a product and services that will continue to evolve, supporting you and your business objectives for years to come.

- Does the product **seamlessly integrate** with your organization's everyday business and document applications?
- Is the vendor committed to continuously **strengthening its core** platform?
- Does the vendor **partner with its customers** to help them achieve their business goals?
- Is the product developed with your business model in mind, and is it user friendly?
- Is the product user-friendly, allowing your staff to adapt quickly?

Time and time again, our customers tell us that they are amazed at just how EASY VyperSoft ADMS is to use. Our trainers guide you through every step of implementation - that is, getting all of the basic data entered so your staff can start using ADMS to enter in their person-centered daily activity notes! Once housekeeping is established, your staff has plenty of time to investigate the intuitive interface as they enter daily activity notes with a full 30 day unrestricted evaluation period. During this time, your staff will become comfortable with just how user-friendly ADMS is and all that is left to do is set your "go-live" date!

Just how safe is your data?

One of the most frequently asked questions about moving to electronic documentation is "where is my data stored?" With VyperSoft ADMS, your data is housed in your facility, not left to the whims of hackers of the internet. If your internet is suddenly down for days due to a storm or other related incident, there is no need to worry, because you have your data stored right on your ADMS in-house server. We also backup your data every hour on the hour internally to a secondary drive on your server, and then double encrypt it each evening to our secure off-site storage facility. This extra level of added security allows VyperSoft to get you back up and running in no time in the event of a disaster. Protecting your clients' data is first and foremost, and cloud-based (internet based) solutions just can't match the stability of VyperSoft ADMS.

ADMS News

ADMS Welcomes New Customers:

Rutledge Service Center - Newnan, GA

Network Day Service Center - Rome, GA

New ADMS Features Added:

Emergency Plans:

We have just completed an Emergency Plan storage module. With this addition you will be able to store all your agency Emergency Plans which will be accessible to all staff members. Each staff will have the ability to create a review history for each plan.

Security BLOG:

Follow our security BLOG to keep up with computer fixes and updates that will help keep your computers and your network safe from outside attack. [Click Here](#)

About ADMS

VyperSoft's Agency Data Management System was developed with the assistance of agency coordinators to make it one of the most complete and user friendly solutions on the market today.

A complete electronic records management system, your data stays in your agency for security and reliability.

No IT Department...No Problem

When you purchase VyperSoft's ADMS, you do not have to worry about any of the installation or the maintenance of the installed equipment.

Your annual support fee covers everything...and we do mean everything. We troubleshoot your ADMS over the phone, and we will send a technician out if necessary.

Get your agency on Electronic Documentation today without breaking your budget.
